## Is Buddhism Truly Compatible with Science?

1. Yes, Buddhism is compatible with science.
  - a. Buddhism is compatible with science because Buddhism does not involve worship of a deity.
    - i. Buddhism “rejects metaphysical speculation” (Cho, 2012, p.539).
    - ii. Support from literary source (citation).
    - iii. Support from literary source (citation).
  - b. Buddhism is compatible with science because . . .
    - i. Support from literary source (citation).
    - ii. Support from literary source (citation).
    - iii. Support from literary source (citation).
  - c. Buddhism is compatible with science because . . .
    - i. Support from literary source (citation).
    - ii. Support from literary source (citation).
    - iii. Support from literary source (citation).
2. No, Buddhism is not compatible with science.
  - a. Buddhism is not compatible with science because Buddhism . . .
    - i. Support from literary source (citation).
    - ii. Support from literary source (citation).
    - iii. Support from literary source (citation).
  - b. Buddhism is not compatible with science because Buddhism . . .
    - i. Support from literary source (citation).

- ii. Support from literary source (citation).
  - iii. Support from literary source (citation).
- c. Buddhism is not compatible with science because Buddhism . . .
  - i. Support from literary source (citation).
  - ii. Support from literary source (citation).
  - iii. Support from literary source (citation).
