ABORTION

IT doesn't make you "unpregnant"
IT MAKES YOU
THE MOTHER
OF A DEAD BABY.

Topic #1

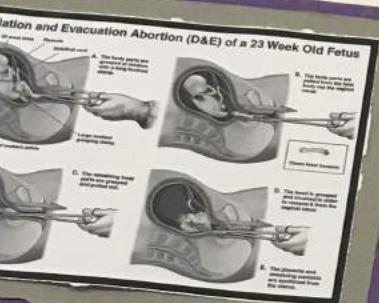

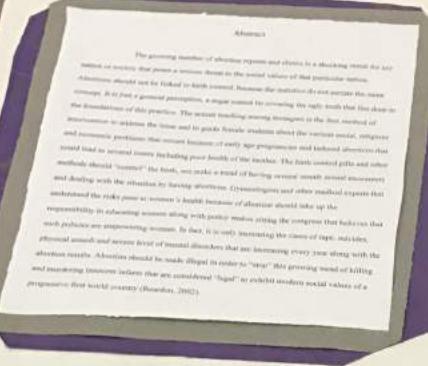

A person is charged for a life sentence and sometimes a death penalty for taking a life of another person and is labeled as cold blooded murder, while a mother taking away the life of her unborn baby is called birth control.

Topic #2

Abortion is a tough decision, taken by the mother in order to kill her unborn baby. There are many reasons, theories, theological beliefs, social and economic factors and political insurrections in the social values that force a woman and her family to take up this decision of getting an abortion (Boland & Katrize, 2008).

Topic #3

The reports state that almost 205 million mothers undergo induced pregnancy around the world. More than 25 percent of these cases are the unintended pregnancy that occurs due to various rapes, incest or unprotected sex which leads to early age pregnancies.

Introduction

The growing number of abortions is increasing, not only in the overpopulated countries, but also in the underdeveloping countries as well. This thesis presents an overview based on facts and reasons why abortion should be declared illegal in a society (Grimes & Stuart, 2010). It is necessary to understand the various social, political and medical reasons that cultivate because of the inhibition of abortions in a region (Grimes & Stuart, 2010). Abortion is the ending of pregnancy by forcing out or removing the unborn baby from the womb, embryo or fetus before the infant can breathe in the free world. It is ironic that as human beings, we preach freedom and we have abortion clinics who are taking away that freedom from thousands of unborn babies had nothing to do with this entire activity. However, even after thousands of years of cement in philosophy, sociology and biology by mankind, it is still the parent's decision of the life of their "unborn" baby (Raymond, Grossman, Weaver, Toti, & Winikoff, 2014).
