

I believe that if a person gets a good education, he can achieve all his dreams. My parents did not have a good educational opportunities. However, SACM has opened it is door to help us to complete our education in Saudi Arabia. Moreover, it allowed us to study almost around the world. However, I have chosen the USA for ^{several} some reasons.

good

First of all, I came to the USA because it has a good universities reputation for the future career. For example, I have heard a lot about CLU and how the way that they teach. Moreover, I know some people who graduated from this university and they really recommended to me, so I decided to complete my dream here in CLU. Getting my Master degree will help me a lot with my future to live and have a better life and better future career.

Where is the second reason?
When you start with "first" there is usually a "second"!!
